A freelancer from the projects.co.id site that provides various website creation services and also android development.

Internship

PT. BONET UTAMA
(January 2022 - March 2022)

Inter Software Engineering in Internet Services Provider company in Bogor, Indonesia (PT. BONET UTAMA). Made several applications that were worked on by PT. BONET UTAMA, namely the Web of SMKN 3 Bogor City, LSP SMKN 3 Bogor City and also CCTV DLLAJ Web by moving as a Backend Developer.

Projects

SMART-BEE (July 2021-present)

"Creating a product for agriculture technology. Specifically, Users can access the website to control the product that can be located on the desired ground. The product has a sensor that can detect soil moisture and can be monitored via the website. If the moisture of the soil is detected below 30% then the water pump will burst water until the soil moisture is above 30%. Moreover, users can click the fertilizer button on the website so the pump will ooze fertilizer. Users also can track the data such in real-time from the website as soil moisture percentage per 10 seconds, how much fertilizer oozed per day, and soil percentage per day and month."

eTPPAD (July 2021 - July 2022)

"Developing financial web admin and android apps. In particular, Accounting (E-AKUNTING), Soldier monthly contributions (E-TPPAD), Soldier pension return (E-BALTAB), and Soldier mortgage loans (E-KPR) for the Indonesian Army (TNI AD) and a National Bank (Bank BTN). Furthermore, the android app currently has been downloaded for over 50.000 users from google play and has been used nationally as the Indonesian Army's official financial app."

Plantsasri (Jan 2022 - May 2022)

"create a plant import export website for farmers in Indonesia with features ranging from making submissions, payments to delivery to a predetermined address (has tracking related to DHL and UPS) with international shipping coverage and also a website that is used to make it easier for farmers to take care of letters to legal entity in Indonesia with a target market of people around the world."

Marketplace Plantsasri (February 2022 - July 2022)

"Continued from the previous Plantsasri where this is a marketplace website such as Tokopedia and Shoppee but only operates in the field of plants with various payment methods (Euro, dollar, Canadian dollar, etc.) and also several features provided to make it easier for users and admins starting from using SPA pages, payment via paypal, midtrans and stripe, equipped with anonymous carting which makes this website convenient to use in shopping, has realtime notifications to both user and admin mail, currency conversion in manual payments and many other features."

Invitation Web   (May 2021 - August 2021)

"invitation website created to make it easier for other people to design their own invitation letter and deploy it in the form of a website."

PLab SMKN 4

"Websites created in order to solve problems where the lab is often full and so on, a website is made as a medium for booking the lab."

MadeByDesign Website

"a website that is intended as a medium for selling designs ranging from game design, mobile to website."

SMKN 3 BOGOR WEB

"the website of smk 3 bogor city which is used as a medium of information related to PPDB and new student registration and also acts as the company profile of the school."

CCTV DLLAJ KOTA BOGOR

a website created with the aim of being able to monitor highways online using httpstream.

Etc.
